## The Fire Protection International Consortium, Inc.

Peer Review and Independent Third Party Plan Review

[www.the-fpi.com](http://www.the-fpi.com)

The Fire Protection International Consortium, Inc can provide peer review in a timely, cost effective manner, tailored to your project. Today's exciting projects often demand a performance based approach to code compliance. Complex systems like smoke control or performance based engineered design alternatives to prescriptive code requirements may require peer review.

Our professionally licensed staff can also provide Independent Technical Review (ITR) for government projects.

Whether you are an AHJ in need of an extra set of hands to get you through a busy time or unusually demanding project or an architect looking for an independent third party to satisfy a plan review requirement, FPI can help!

### **MISSION STATEMENT**

*As your fire protection, life safety, and security consultants we provide you with an unbiased, independent evaluation of your needs based on code requirements and sound industry practices. As your consultant we seek to provide you with cost effective solutions without influence from contractors or other sources.*
